

SUPER-LIGHT SERIES

The Superlight ramp is the latest loading solution range from WM System. With its gas spring assistance, the ramp is super light weight to operate. Superlight is equipped with a quick-release system which allows for easy transfer between any light commercial vehicle. There is also an optional swivel rotation kit available. There are 3 standard lengths of 200cm, 225cm & 250cm. The standard capacity is 250kg. The non-slip aluminium floor allows for safe and easy loading of all types of goods and equipment. The vision clear option is available for those wanting to see out of their window.
